We also offer FREE consulting and recommendations!!

*This season let us take care of your landscaping needs...*

*...and enjoy the outdoors with your family like you should*

## Lawn Care, Tree & Shrub Care TIPS...

**Spring clean up** - Rake the dead grass, dead leaves and any other winter debris as soon the weather permits (March - April - the sooner the better). The spring cleaning up will expose the lawn to sun and, it will reduce the dead spots on your lawn caused by winter mould. Also it will make the lawn to be ready to receive "The Wake Up Fertilizer" which will give a much better spring appearance.

**Lawn cutting** - Make sure your lawn gets cut on a regular basis (at least once a week) at 5 cm height in spring and fall; and at 7 cm height in summer time.

**Lawn Watering** - The best time to water the lawn is in early mornings (5AM - 7 AM). In spring when temperatures are under 25 C and it is not raining water the lawn every 2-3 days for 20-30 min. each time. In summer when temperatures are exceeding 25 C and it is not raining water the lawn every other day for 30-40 min. each time. In fall when temperatures are not exceeding 25 C and it is not raining water the lawn every 3-4 days for 20-30 min each time.

**Fall leaves clean up** - In some situations it is necessary to do a leaves clean up for 2-3 times. The main reason is that if the fallen leaves are covering the turf for more then 6-7 days in a row especially when the lawn still grows, the turf can suffer a permanent damage. Also make sure your lawn goes in winter as clean as possible.

**Tree and shrub pruning**  
The best time to prune a tree and clip a shrub is before the buds break (early spring) and before the second growth (August - September).

**Tree and shrub watering**  
Water once a week, in the morning each tree and shrub with 20-40 L (depending on the size) in the dry season.

**Tree and shrub winter cold protection**  
Maple trees and most of fruit trees that are still young (intense developing stage) need their trunk to be wrapped up with burlap (protective material) before winter and unwrapped in spring. Also many evergreen trees and shrubs (Alberta Spruce, Junipers, Cedars and Boxwood) need to be covered with burlap before winter and, uncovered in spring.
